AGENDA

01

MCP Servers

Connect AI assistants directly to your ABP application via the Model Context Protocol.

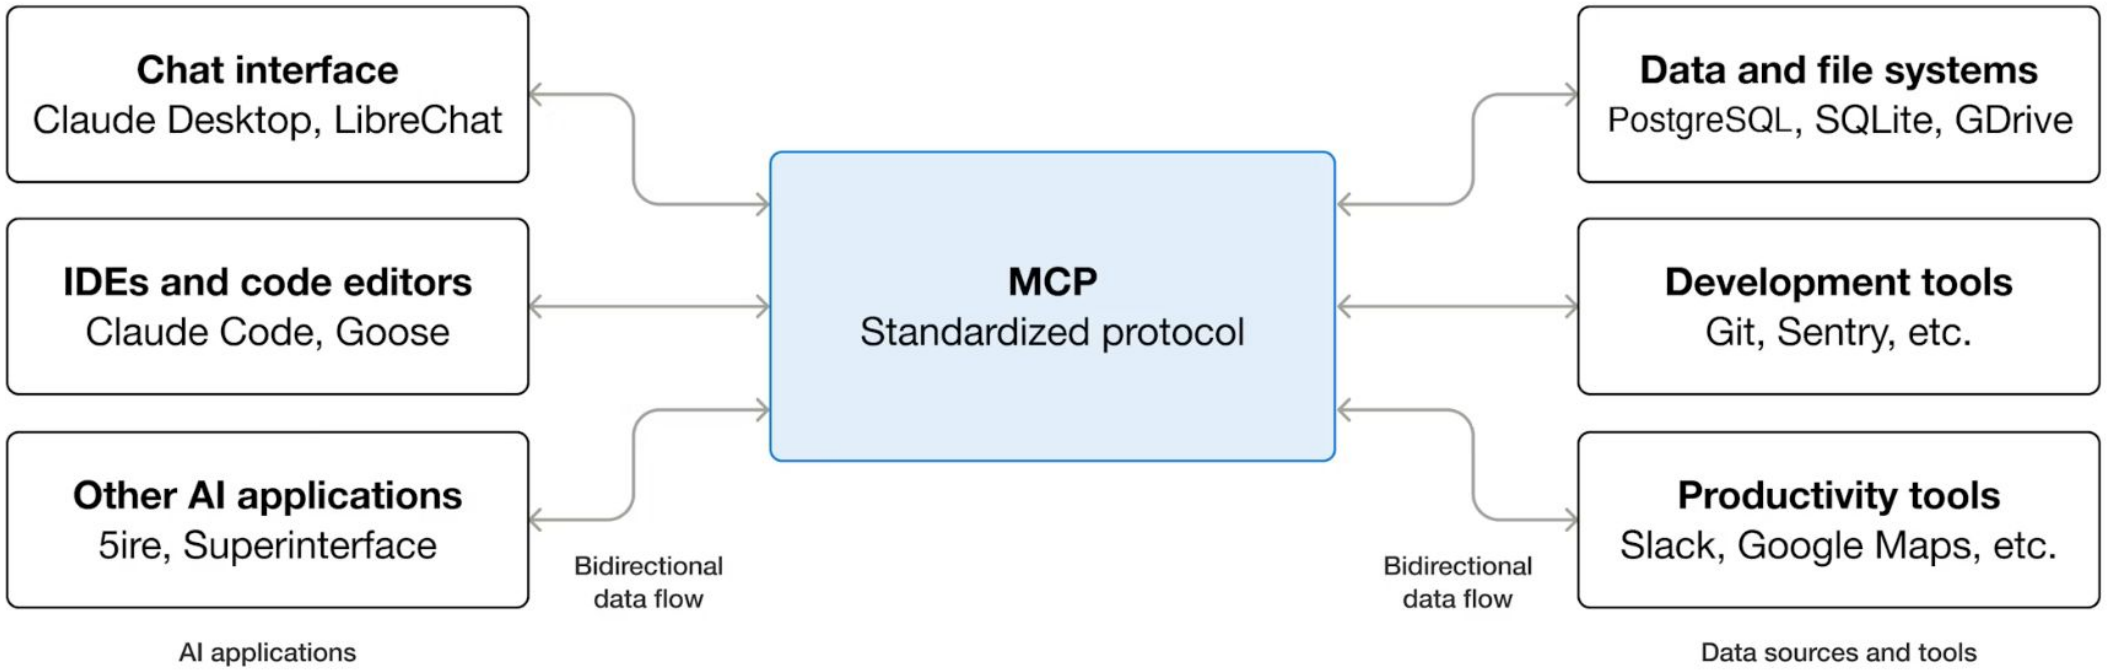

02

OpenAI-Compatible Endpoints

Expose your ABP app as an OpenAI-spec API — drop-in replacement for any OpenAI client.

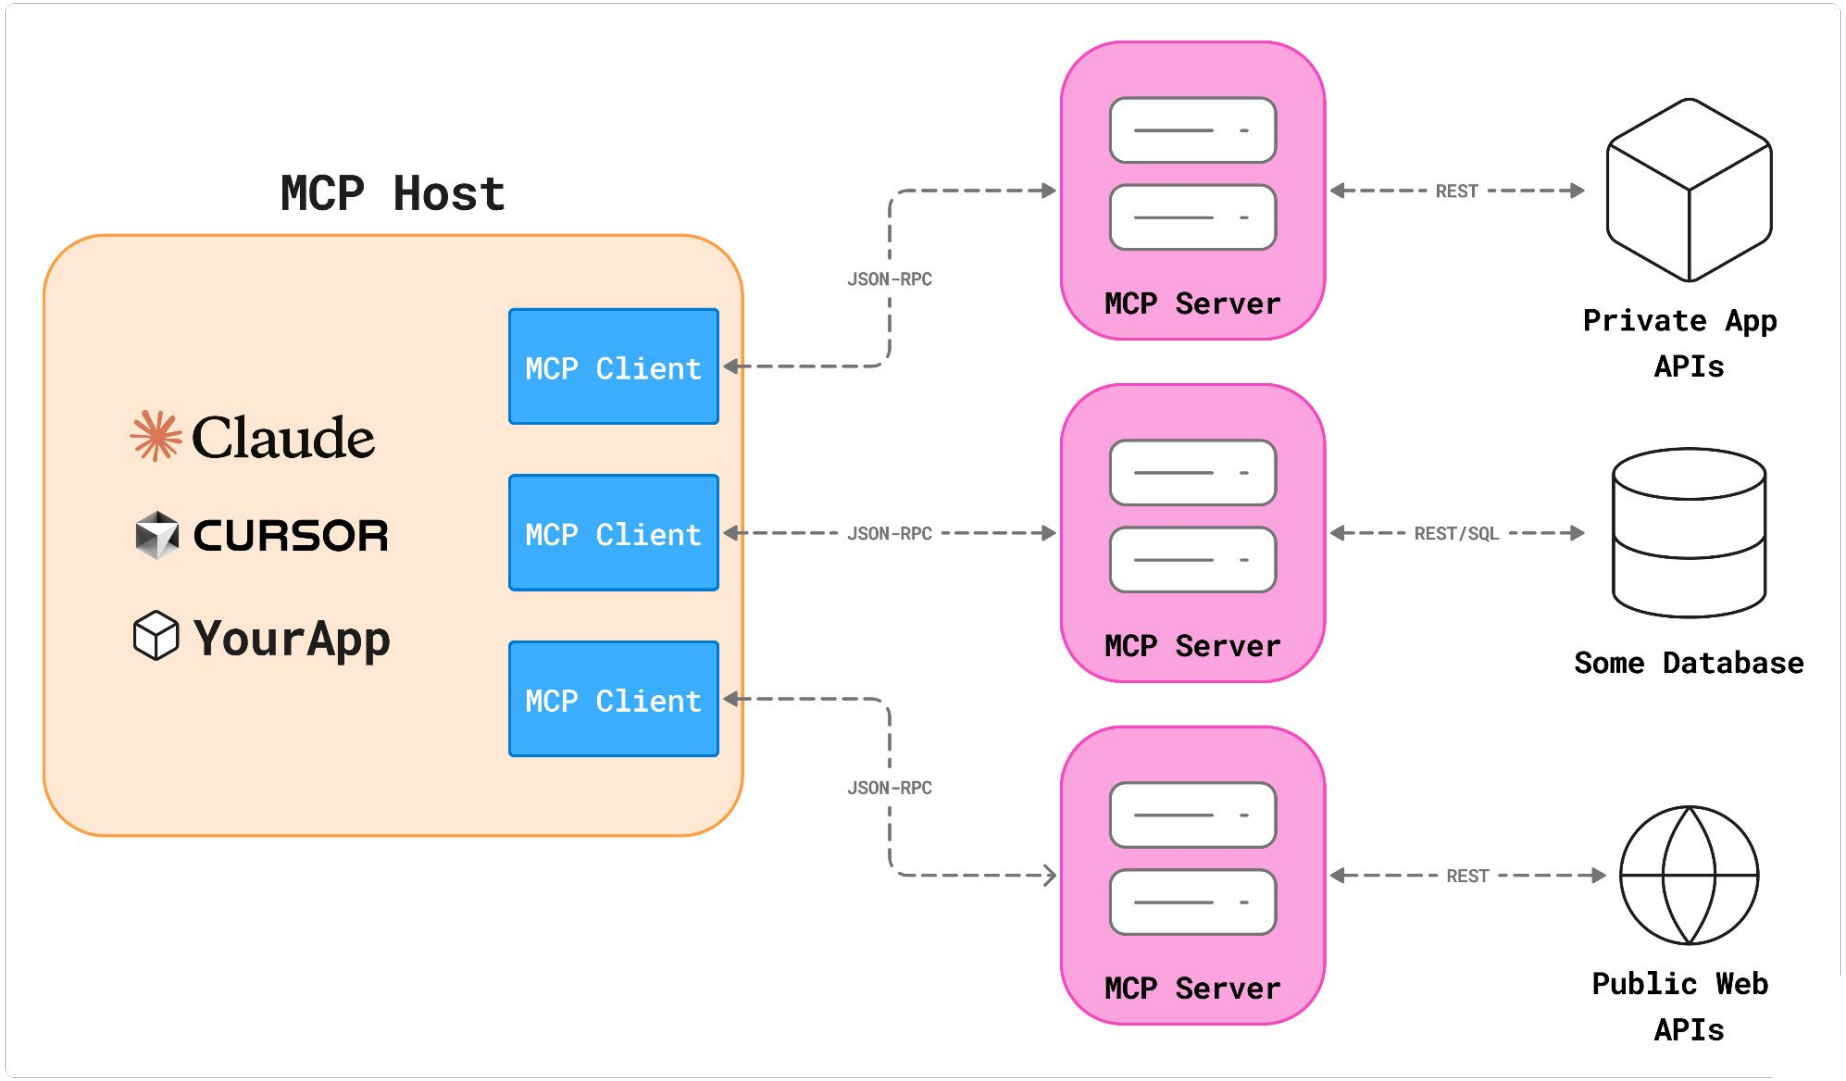

abp.io

Model Context Protocol (MCP)

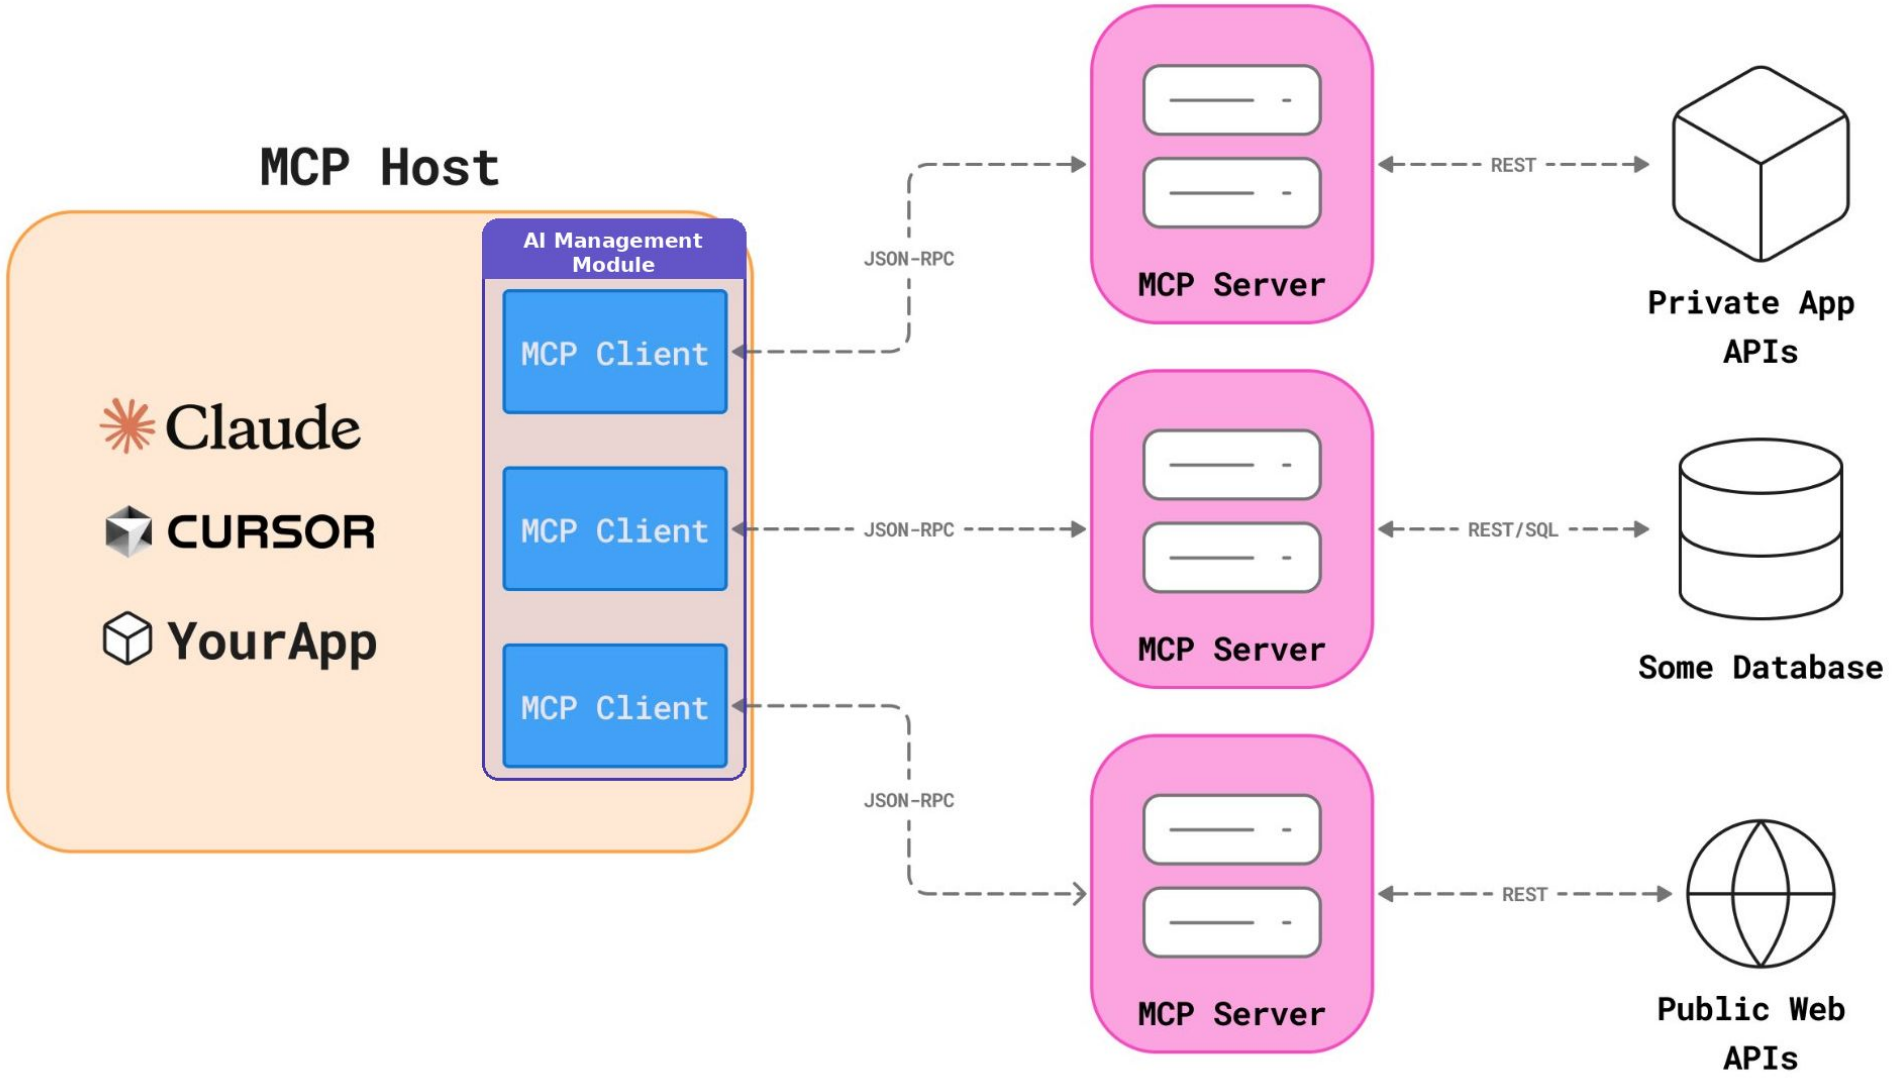

abp.io

Architecture (Host/Server/Client)

So... Where Does ABP Fit in This Picture?

HOW IT WORKS?

1

Create & Test Connection

Create a new MCP Server & list available tools (test connection)

2

Connect

Connect MCP Servers with the relevant workspaces

3

Use

Test it in the chat playground or consume it in your system directly

Docs: https://abp.io/docs/10.2/modules/ai-management#mcp-servers
